

Biography

I earned my bachelors degree in mechanical engineering from the University of Mumbai in May 2009. In August 2009, I joined the graduate (masters and doctoral) program in the mechanical engineering department of the Georgia Institute of Technology. I was based at the Metz Technopole campus of Georgia Tech (Georgia Tech Lorraine). I received my Masters of Science degree in Mechanical Engineering from Georgia Tech in May 2012 and my PhD in Mechanical engineering, also from Georgia Tech, in December 2014 under the supervision and direction of Laurent Capolungo. From January 2013 to November 2014, I was engaged as a research engineer/student at LEM3 under the supervision of Vincent Taupin, and also worked closely with Claude Fressengeas. In December 2014, I joined as a post-doctoral researcher in the group of Helena van Swygenhoven at the Paul Scherrer Institute in Switzerland. In January 2019, I started as an Assistant Professor in the Laboratoire de Mecaniques des Solides (LMS) of the Ecole Polytechnique in Palaiseau, France.
